

California Workers Comp Insurance

Last Updated Thursday, 12 February 2009

Workers Compensation Insurance is required in the state of California. Whether you are a new business or an existing corporation ready to rethink their workers comp insurance policy, Allegheny Pacific Insurance Services, Inc. can find you the ideal workers comp provider and policy for your situation.

Remember, workers' compensation insurance covers injuries and occupational diseases picked up at work. Fault doesn't matter; employers are liable even if the employee may have contributed to the injury or illness. Without workers comp insurance, you open yourself and your company up to a tremendous risk and you may be breaking the law.
